

Assignment AN-A6

Point to Note

- a) The code should be properly indented.
- b) The names of the variables and functions should be appropriate.
- c) There should be no unnecessary code.
- d) The application should look and behave as shown.
- e) Test the code properly. Think about all the test cases and make sure that you have tested it.
- f) With the code also submit a test report. This testing report should have all the errors in the application. It should cover all the functionality and appearance. If any feature has not been implemented, it should be stated in the testing report.
- g) 20% of the marks are for the test report.
- h) Any submission without the test report will not be accepted.

SECTION A

This section carries 50 marks.

Make the app as shown in the demo at <https://youtu.be/GKajcz5wP9M>

Ensure that the app has the proper UI as shown in the video. Also test it thoroughly. Create a detailed testing report. This testing report should have all the errors in the application. It should cover all the functionality and appearance. If any feature has not been implemented should be stated in the testing report.
